### **DETAILED ACTION**

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A: Figures 2;

Species B: Figure 3;

Species C: Figures 4;

Species D: Figures 5;

Species E: Figures 6.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: None of the claims appears to be generic.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features and are patentably distinct.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Comments Intended To Advance Prosecution:

(A) There are no clear antecedent bases in the claims for a number of elements such as "the brake circuit" of claim 1, line 22 and "the brake member" of claim 1, penultimate line. Note that claim 1 defines two "brake circuits" in lines 2-4. Claim 1, lines 2-5 define two "brake members".

(B) Claim 1 is not generic in that the feature of claim 1, lines 26+ does not appear to read on the embodiments of Figures 5-6 but rather on Figures 2, 4.

© Method claims 9-12 do not recite the steps for performing the method of braking.

(D) Note each of the references cited on Form PTO-892 with throttles or restrictors.

See, for example, Figure 1 at 71, 69 of US005417483A ; 36 of Figure 3 of US005988774A ; Figure 1 of 5,662,390.

(E) Note the translations for submitted DE 4320390 and DE 19624548. A translation of submitted WO 97/21574 will be furnished to applicant when available.
